## LOCAL GIRL HANGS UP NEW RECORD

Adding further laurels to her credit, Margaret Fitzpatrick, on May 24th carried off five prizes at the Cardston and District Meet, including the 100 yards dash. Margaret hung up a new provincial record for this event, running the stretch in 7.1-5 seconds. As well as winning first in this event, Margaret took first place in the following:- 100 dash, running broad jump, shot put—and to round off a very successful day, third prize in the baseball throw.

This young lady holds the following Dominion and Provincial records:-

Dominion Record  
60 metres (Imperial)  
Provincial Records  
60 metres (Intermediate)  
Running Broad Jump (Junior)  
Running Broad Jump (Senior)  
High Jump (Junior)

The Chronicle joins with her many friends in extending congratulations, and best wishes for her continued success.

## East Community Hall Cremates "Big Bad Wolf"

A vast and merry throng crowded the East Community Hall last Thursday evening, May 24th, some 400 people in all. The dance music was furnished by The Melody Boys but on this occasion was not quite up to their usual high standard.

The feature item of the intermission program were the MacDougall children of Calgary, and their numbers were well received, and they lived up to the splendid reputation they have hung up in this district. Appearing on the same program were the Farrell Bros. of Cartairs, and their yodeling songs and guitar duets, were also given hearty applause. The lunch was excellent, and the ladies who provided same, deserved great praise for their share in this regard.

After supper the big event of the evening was held, that of burning the mortgage, and to fully illustrate the full import of this special ceremony, a replica of the Hall surrounded by promissory notes, and other papers, was set up together with a picture of a man who wore a broad smile. The speaker of the evening, R. M. McCool, local M.L.A. for this district, gave an account of all the happenings in connection with the Hall from its commencement up to the present time, and at the conclusion of his remarks, he called upon O. E. Jones, to set a match to the papers and notes, and after they had burned away, only the replica of the Hall was left, together with the picture, which upon examination was seen to represent O. E. Jones. Mr. Jones has been the big noise behind the scenes, and it is due to his untiring efforts, that the Hall Committee, can now sing with the three little pigs, "Whose afraid of the 'Big Bad Wolf'?" Yes, "Big Bad Wolf" is gone and his ashes strewn to the four winds, and to all and everyone who has helped supply the material to make this possible we extend congratulations.

## Engagement is Announced

Mr. and Mrs. George H. Lieberman, of Didsbury, announce the engagement of their younger daughter, Orpha Marguerite, to Mr. Howard Duane Halliday. The marriage will take place the latter part of June.

The Board of Railway Commissioners will meet in Calgary, June 1, and will consider the application of the Village of Crossfield and the Municipal District of Rosedale for the re-opening of the railway crossing, north of the village limits, which was closed by the Commission in November 1933.

The Municipal District of Rosedale is going to gravel the road from town to the cemetery this summer. George Jones has been awarded the contract for the graveling and will commence work on Thursday morning.

## Keeping Up Quality

The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of its service to farmers in handling their grain and furnishing them with farm supplies.

## Obstacles To International Agreement

Obstacles to international agreement are many and various; so many, so various as to cloud the vision of the conferees and defeat the ends sought. Particularly is this true when a complex of nations is represented round the conference table. Despite the good intentions of conferees, the high sentiments they express and the noble purposes they proclaim, invariably dissonance interrupts the even tenor of the proceedings, divergent points of view prostrate themselves and, with each interruption and each prostration, practical agreement becomes the more remote.

The conflict of opinion appears less with regard to the general objective sought, as with regard to the methods by which that objective can be reached. In the ultimate analysis, political rather than practical issues prove the stumbling block.

These thoughts are occasioned by the succession of disasters which has befallen world conferees held for perfectly laudable purposes during recent months. The League of Nations itself, perhaps the greatest agency for world co-operation yet devised, has suffered considerable loss of prestige through recurrent manifestations of local interest, local jealousies, pride and susceptibilities. In matters such as the drug traffic, in which public rather than political and national considerations are paramount, the League has been able to take decisive action and render invaluable service. But where political and national interests and prejudices are involved, directly or indirectly, its decisions have been of less unanimous acceptance. In fact, they have seldom been effective because they have been largely ignored.

In spite of the League and the large body of opinion supporting it, where matters of national significance have been broached, the nations involved have proved law unto themselves, using the simple expedient of withdrawal from the League as a means of asserting their right to go their own way. Disarmament questions have brought prominently into the foreground this conflict of national viewpoints, and this insensate desire for autonomy in matters affecting the peace of the world. There can be little question that world opinion, generally, favors disarmament on a sane and safe basis. It is equally true, however, that there is sharp clash of opinion as to what the basis should be and as to the methods whereby it should be attained. World disarmament conferences have proved futile, so far, in spite of the unanimity voiced by national spokesmen as to its desirability. All nations, it appears, are in favor of disarming—provided the other fellow does it.

Strange as it may seem, while world conferences on the question are disheartening failures, the same can not be said with respect to understanding on the subject between particular nations. Bilateral disarmament agreements appear easy, by comparison. Where two or three nations are involved, amicable solutions come readily to hand. Britain, for example, has little difficulty in reaching understanding with Italy, Italy with France, and so on. Even with Germany amicable negotiations are possible. Yet, when Britain, Italy and France sit around a conference table with Germany, it becomes immediately impossible to focus all eyes on the same objective and on the same means of achieving that objective.

This is not to say that Germany is entirely at fault, or that the blame attaches to any particular one of the parties to the conference. It is apparently due to the complications which arise with every addition to the conference. Compromise as between nation and nation is easy; between three nations it is a little more difficult, but less difficult than when four nations are involved. Perhaps then, the real solution is to be found in multiplying bilateral disarmament agreements until the whole world is involved and all the nations are accounted to.

The same course may be followed in the economic aspect of the world wheat problem. Apparently the London Wheat Agreement has founded on the shoals of national aspiration for as this is written, the Argentine has virtually negatived the good work accomplished in the London conference, and the United States, in reprisal, is threatening unlimited production and the dumping of its surplus on the markets of the world.

The London conference resulted in what has been acclaimed as a unanimous agreement representing the first really co-operative arrangement yet reached by the nations of the world. It was not, however, a finite thing, in itself. It left certain important decisions for later consideration, particularly the matter of minimum prices. Experts met at Rome to discuss prices in accordance with the terms of the agreement, only to be met by objections from the Argentine and demands from that country for an increase of 40,000,000 bushels in her quota allotment. Having already virtually exhausted her export quota for the year as set in the London Agreement, the Argentine demanded an additional 40,000,000 which could only be given at the expense of other great exporting countries, including Canada. The price conference, however, reached certain tentative conclusions which were submitted to the governments involved.

The next stage in the proceedings was the London conference on prices to amend or ratify the decisions of the Rome discussions. Here again, clash of national interests proved a handicap. Doubts have been raised whether or not production by a central body is a sound practice to adopt. In fact, British grain men have been realistic and outspoken on the subject. The head of the London grain exchange, in his statement in stating that the representatives of the various nations were amiable gentlemen, "but they knew very little about wheat." With warnings against price-fixing, demands for increased quotas, and threats of unlimited production, the whole agreement appears in jeopardy. Obviously, the complexity of national interests is accentuated in conferences on so large a scale as that at London. Perhaps (it is repeated) the solution may be found in a series of bi-lateral agreements involving all interested parties.

## Used Sign Language

Sign language was used by members of the Western Canada Association of the Deaf as the medium of presentation at a unique concert in Saskatoon. A short play, given by school pupils, depicted early education of the deaf in this country. In addition, "O Canada" was rendered in the sign language.

## Phones For Dinner Guests

Guests at a telephone service dinner at Grosvenor House were able to talk to friends at the other end of the dining hall without leaving their seats, telephones being installed on the tables for this purpose.

Ordinary printers' ink is used in making fingerprints.

### Health For Young Girls

### Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness makes life a burden.

The whole outlook of life is changed when the nervous, sick headaches, the sleeplessness, the spills of nerves, the restlessness and discouragement, and the tired, languid feelings disappear with the use of Milburn's H. & N. Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.

## "Britain Of The East"

## Story Of Japan's Progress And Development Roads Like Romance

Whatever may be said of the aggressiveness of Japan in the Orient, it must be acknowledged that she deserves the designation, "the Britain of the East". Never in the history of the world has any of the backward nations made such gigantic strides forward in the path of civilization as has Japan.

The story of her progress and development reads like a romance. From the very time when she reformed her government and established democratic institutions she has gone forward in the path of educational and scientific progress and in industrial development at a remarkable rate. Her educational and scientific institutions are among the finest in the world. Moreover, her army and navy have reached a stage of development that is second to no other country. Hence, Japan is a nation so perfectly equipped from a technical and scientific point of view that her progress may well be feared by other nations. To make light of her industrial development shows a lack of appreciation of the remarkable progress she has made—Brantford Expositor.

## DEPRESSED BY ACUTE ACIDITY

There can scarcely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief as in this woman's case:

"At last it became so acute that every morning I woke with a gnawing pain and a great depression of spirits that nothing I did would effect any relief and the depression lifted like a cloud. I have taken the daily dose of Krueck's ever since. That won't do for five years its effect." (Miss) E. M. H.

Krueck's is so effective with both acid and indigestion that it takes all the torment out of it, and greatly relieves it from the system. And by stimulating your organs of digestion it creates regular action. Krueck's will prevent acidity from even accumulating again. After that you'll experience no more misery after meals.

## Canada's Metal Industry

## Dominion Dominates World States President Of Mining Institute

Within 20 years Canada's metal industry has grown by such leaps that it was possible to-day for the Dominion to produce practically all the copper, most of the lead and zinc and all of the nickel needed in the Empire. S. G. Blaylock, president of the Canadian Institute of mining and metallurgy, stated.

He was addressing a complimentary banquet given to him by the Grand Forks Board of Trade in connection with the convention of the Associated Boards of Trade of Eastern British Columbia.

Canada dominates the world in copper, nickel, lead and zinc, said Mr. Blaylock.

Mr. Blaylock thought there was little likelihood of the price of gold dropping for years to come. As a metal producer, the Consolidated Mining and Smelting Company of Trail, of which he is vice-president and general manager, had agreed to send with the 10 per cent tax on gold. Nickel, lead, copper and zinc producers would be only too glad to pay millions in taxes on these metals if the price was 75 per cent over the normal price of 20 years, he stated.

## Japan Buying Scrap Iron

## Recent Cargo From Australia Contained Variety Of Articles

Japan has been picking up scrap iron all over the world, and one of the most varied cargoes of this kind arrived the other day from Australia. There were steel rails red with rust, old sewing machines, and automobile fenders. On the top of one heap was a battered trombone. Scores of old drums ranged side by side with piles of worn-out machinery; car wheels, cooking stoves, and scores of other ancient and apparently useless articles, together with hundreds of thousands of old horse-shoes. Even obsolete cannon were in the cargo.

## A Good Definition

Crooning? Here is a college professor's illuminating definition of it: "An exaggerated and distorted expression of emotional feeling, a kind of semi-musical noise that is emitted from the throat and attractive to some persons because it is something new. Only people of low intelligence like it." It was decided thus by Dean John Patten Marshall of Boston University College of Music.

## Wants Room For Expansion

## Mussolini Expresses Need For Italy To Seek Room In Africa And Asia

Geographic and historic reasons were given by Mussolini in an interview with Hector Bywater, editor of the "Daily Telegraph" in Rome, for the expansion of Italian power in Africa and the Far East.

During the interview, Mussolini said:

"Thirty provincial capitals are situated on the coast. Rome herself is near the sea. Geography is one of the immutable factors that determine the destinies of a nation."

Then he went on to say:

"Geography and history both warrant us in taking Asia and Africa as objectives. We are nearer to those two continents than any of the greater western European powers. No one should mistake the meaning of our task. We are not thinking of any territorial conquest, but everyone should know that we are thinking of a natural expansion allowing us to co-operate with the nations of Africa and the Far East."

Mussolini then turned to the problem of the League of Nations and of discussions on the subject.

"The principle of the reform of the League of Nations, which is almost universally accepted, is clear. The reforms that are being considered should only be undertaken after the closing of the disarmament conference, because if this conference fails, there will be no need to make any reforms, it will be enough to consider the work of the League of Nations as ended."

"It is generally considered that the conference will fail, at least as regards the most important objectives. The greatest armed powers will not disarm; those that are not armed will be in a position to arm with a more or less defensive purpose."

## Paris Hotels Face Ruin

## Taxes Heavy And American Tourist Business Falling Off

Instead of opening the customary new extensions as the tourist season starts, one leading Paris hotel, the Plaza- Athenee, already has closed its doors, and numerous others are on the verge of doing likewise.

Hotel managers blamed two factors for their present distress, that an average of one-third of all money taken in must be sent to the state in the form of taxes. Secondly, that the American tourist business has almost evaporated.

"If this continues for a short time more we'll have to close up too," the director of a leading hotel in the Etolie district declared.

Here are a few of the hotel taxes: Six per cent. of every penny collected as a luxury tax.

Four per cent. of all room bills as a social insurance tax.

A tax for apprentices.

A tax for mutilated soldiers.

A property tax.

This totals from 25 to 50 per cent. of receipts.

## New School Readers

## Uniform Standard To Be Adopted By Four Western Provinces

A new standard of school readers has been adopted by representatives of the four western provinces used in the public schools. These representatives have been meeting from time to time for past two years judging the contents of books. The seven books in the new series are to be known as "Highways to Reading." The books will be adopted as school readers for the fall term of 1935. All will be uniform in style and will be admirably bound and will have colored illustrations. The printing will be done in Toronto.

The fox-tail lily is a striking looking plant for the back of a large border. It is also known as "the desert candlestick" on account of its long strap-shaped leaves and tall spikes of flowers like a column or a candle.

## "Blue" Spells

Reduce some women to tears of despair, others to a smile of contented smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It helps to ease the nerves... helps to tone up the general health... gives them more pep... more charm.

## LYDIA E. PINKHAM'S VEGETABLE COMPOUND

# DIXIE

## PLUG SMOKING TOBACCO

## Radio Signals For Aviators

## Ingenious Device Will Keep Fliers In Defined Lines

A device for visually interpreting signals of aeronautical radio range beacons has been developed by W. E. Jackson and L. M. Harding, radio engineers of the U.S. commerce department's aeronautics branch, according to Rex Martin, assistant director of aeronautics.

Signals, Martin explained, are received through headphones by aviators who travel through them during periods of poor visibility.

The device features an indicator which, fitted in the instrument panel, is similar to the contrivance used for blind landings. It is open-faced and has two needles—one vertical and one horizontal. The vertical needle, Martin explained, is chief indicator and when an airplane leaves the course defined by a radio beacon, this needle will move accordingly. However, he added, if the airplane is exactly on course, the vertical pointer will remain in centre of the dial.

The horizontal indicator, the official device, revealed, shows the volume of received signals, which the pilots may adjust as he sees fit.

## Egg Trade Responsibility

## Responsibility As To Eggs Below Grade Placed On Seller

In case of dispute about properly marked cases of graded eggs, the Canadian egg regulations are quite explicit. No case or container of eggs is considered to be properly marked unless it is examined by an inspector, the case is found to contain more than an average of 6½ per cent. below grade, apart from breakage. In transactions between wholesalers, or between a wholesaler and a retailer, any complaints by the purchaser with respect to eggs below grade must be made to the seller within 36 hours of the receipt of the eggs. Once responsibility as to eggs below grade is upon the seller for the period of 36 hours after delivery to the buyer. After the expiration of the 36 hours the responsibility as to eggs below grade is upon the person in whose possession such eggs are found.

## For Civil Servants

## Wanted Temporary Employees Brought Under Civil Service Act

Representations behalf of various classes of civil servants were made by V. C. Phelan, president of the Civil Service Federation of Canada, before the common civil service committee.

Mr. Phelan asked that 316 long-term employees in various government departments who had been eligible for permanent appointment prior to 1927, but through negligence or some other cause were not appointed, now be brought under the Civil Service Act.

## Public School Education

Public school education in Canada costs \$63.80 per year per pupil, according to reports published by the Canadian government. The report shows the total expenditure is about \$160,000,000 a year. In 1932 there were 86,219 teachers, 2,593,116 pupils in the Canadian school system.

## Increased Payrolls

## Movement In British Columbia To Improve Working Conditions

Payrolls in British Columbia have been increased by approximately \$200,000 per month since the provincial department of labor started its drive through the board of industrial relations and other agencies to improve working conditions within the provinces. Hon. George S. Pearson, minister of labor, has estimated.

In the sawmill industry alone, the advance was about \$85,000 a month, he said. The aim of the board so far, Mr. Pearson said, had been to set minimum wage scales as high as could be paid by the industries affected, but so high they would be forced to stop operations. As conditions improved within a particular occupation, the level could be raised if necessary.

## Trying To Find Secret

## Manufacturers Seek Buddhist Method Of Producing Stainless Steel

To study four columns which have stood for 2,000 years without showing a sign of decay or dust, a body of European steel manufacturers are visiting India. They hope to learn how people of those days produced stainless steel. The columns were erected by Asoka, the great Buddhist emperor, in four districts of his Indian Empire. Each stands on a high rock and is inscribed with the laws of Asoka's reign. Through the centuries, earthquakes have not shaken them and storms have not rusted them. The secret of their making is believed to rest with descendants of the makers, and the steel manufacturers hope to learn this.

## Soybeans Profitable

The Farmers' Advocate says many livestock men and dairymen particularly, are finding soybeans a profitable crop to grow. The beans add to the protein content of the meal mixture and for hay they are both productive and palatable.

## CHILDREN'S CONSTIPATION

## Ended!

Mrs. H. T. Roseman, Athens, Ont., writes, "My baby boy was troubled with constipation. I gave him Dr. Williams' Baby Own Tablets and he soon got rid of it... Before I had given half the box the constipation was righted." Dr. Williams' Baby Own Tablets prevent most serious constipation. Much easier to take than laxatives. Much safer and perfectly safe for all little folk from six weeks to babies to school age. 25¢ package.

## Dr. Williams'

## BABY OWN TABLETS

## Scientists Invite Us To Enlarge Our Concept Of Universe Beyond Anything Heretofore Presented

Late news from the astronomical world raises this serious question: Is there collusion between the Administration at Washington and the devout astronomer for the purpose of making the world familiar with large numbers? Or is it rivalry in the expansion of the Arabic notation? Whatever the answer be, the latest that that redoubtable searcher of the beyond, Dr. Edwin P. Hubble of the Mt. Wilson Observatory, invites us to enlarge our concept of the universe far beyond anything heretofore presented by Jeans, Eddington, Millikan and the others, fervid expansionists though they be.

Dr. Hubble's findings are little short of breathtaking. The universe, he declares, is a finite sphere with a diameter of some six billion light years; and when this distance is calculated on the fastest speed of travel at a speed of 180,000 miles a second, the Arabic notation itself is put to the test. But that is only the beginning of his astounding declaration. The universe consists of 500,000,000,000,000 (five hundred trillion) nebulae, each stellar unit of which is 80,000,000 times as bright as the sun and 800,000,000 times as massive. How these figures stagger the imagination!

And only a year ago, Dr. Hubble was content with observing, through the 100-inch telescope on Mt. Wilson, nebulas 150,000,000 light years away. Who shall say that this has not been a year of unprecedented expansion?

We are also assured that beyond this universe, 6,000,000,000 light years in diameter, nothing exists, not even cosmic dust. That is to say, this universe with which Dr. Hubble deals so familiarly marks the end of space, for it is held that space cannot exist without matter.

Here is another important fact. The totality of this mass of matter in the universe has not increased. Because of the constant expansion, it follows, then, that the density of units in the expanding units has greatly increased; that is to say, it is continuing an emptier universe. In the question of mass, Dr. Hubble likens the earth to a grain of sand in this immense space.

If all these marvelous details of the expanding universe have been revealed through a 100-inch telescope, what further wonders will be discovered when the huge mirror now cooling at Corning, N.Y., is ready for use? Dr. Hubble believes that beyond the present frontier will be found countless galaxies or nebulas, all moving at a terrific speed—where? The Psalmist was, according to modern astronomy, speaking in very limited terms when he attempted to indicate the infinite nature of the divine presence.

As we ponder the problems raised by discussion of the expanding universe, especially the accepted theory of relativity that space and matter must co-exist, this question inevitably confronts us: If the conclusion of modern physical and metaphysical scholars that matter in reality is non-existent is true, does it not follow that space must give way to infinity?—Christian Science Monitor.

### Where Credit Is Due

Newspaper Advertising Important Factor In Keeping Things Going

It is rather noteworthy that at the April meeting of the board of directors of the Canada Cycle and Motor Company, Limited, J. W. Gibson, vice-president, explained that the important factor in enabling the company to "beat the slump" was a liberal policy of newspaper advertising. He declared that careful advertising over a period of years had created a trademark in the C.C.M. that made it an asset more valuable to the company than its tools and equipment. That is a remarkable statement, the more it is studied the more it will be seen to be true.—Brantford Expositor.

**Makes Sound Waves Visible**  
Sound waves are made visible, tracing moving pictures of the human voice with a pencil of green light, by means of a device demonstrated in a Denver radio station by R. C. Jensen of Schenectady, N.Y., before a meeting of the Colorado Society of Engineers. The instrument—called a cathode ray oscillograph—is to be used in testing the quality of sounds broadcast from the station.

### How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg

Pattern No. ..... Size. ....

Name. ....

Town. ....

"LOOK! THAT'S MRS. PARKER'S 'USBAND.' E NEVER CAN KEEP A JOB!" —The Humorist, London.

HERO OF THE ARCTIC SAGA HONORED

Professor Otto Yulevitch, who is credited with preserving the lives of 101 members of the Soviet Chelyuskin expedition until rescued after three months on an ice floe, is shown at Washington being welcomed by the Soviet Ambassador Troyanovsky and his wife.

### An Interesting Survey

Shows What American Women Like Best In Newspaper

A survey recently conducted by the school of business of the University of Chicago gives information on what interests the average woman newspaper reader. According to the replies received, bridge lessons and foreign news find little favor with the fair sex. It is also significant to note that women show more interest in editorial than they do in crime news. The more important findings of the survey are summarized as follows:

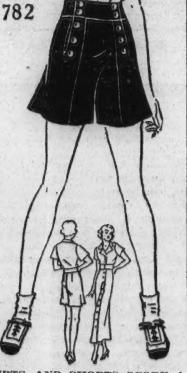

First page news cartoons command 82 per cent of the votes, while the comic strip ranking second with 78 per cent. The comic strip came next with 68 per cent, followed by the health features with 48 per cent, and letters to the editor with 47 per cent. Foreign news ranked last with 8 per cent of reader interest, and bridge lessons were next to the bottom with only 11 per cent.

Perhaps Canadian women's preferences as to newspaper contents differ from their American cousins. Anyhow, "yellow journalism" is practically non-existent in Canada. Nor do Canadian papers play up crime news as much as they do in the United States.

The results tend to show that bridge instruction is no longer keenly sought. Like some of the old favorite pastimes it seems to be on the downgrade. Or is it a case of players having become so competent and self-reliant that they no longer need lessons?

### Selling Bicycles By Mail

Bicycles can be sent by parcel post through a plan thought out by a manufacturer in Birmingham, England. He has planned a distribution of the machine's parts in five packages which come under the Post Office Department regulations. Printed instructions tell how to assemble the bicycle at home.

### SHIRTS AND SHORTS SCORE A SPORTS HIT AND YOU'VE A SKIRT TO DON FOR SPECTATOR SPORTS

Grasp this opportunity to order this pattern today. It includes the skirt and shorts to match. It's the smartest outfit for Tennis!

Camp! Hiking! Beach! Mountains! For tennis the skirt and shorts are indispensable. And after you've don'e you've a skirt to don. It's so easily slipped into and adjusted. It buttons from waist to hem.

Now, if you're going to camp, you'll want several of these smart rigs.

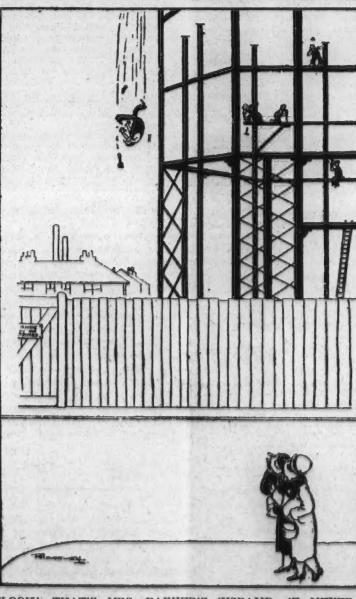

Figue, peasant linen striped or checkered, plaided gingham, cotton shirting, broadcloth, etc., are attractive materials.

It's very easily fashioned and surprisingly inexpensive.

Size No. 782 is designed for sizes 10, 12, 14, 16, 18, 20, 22, 24.

Size 16 requires 3½ yards of 39-inch material for blouse and skirt, 1½ yards of 39-inch material for shorts.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"LOOK! THAT'S MRS. PARKER'S 'USBAND.' E NEVER CAN KEEP A JOB!" —The Humorist, London.

## New Rules And Regulations To Govern Commercial Poultry Hatcheries Throughout Canada

### Has Invaded Canada

Infectious Bronchitis Found In Poultry Of Two Provinces

Infectious bronchitis has been recognized in North America since 1922 and has been increasing in economic importance annually ever since. It has been reported in at least 39 states and in at least two provinces in Canada, according to a statement by W. R. Hinshaw of the California College of Agriculture at Berkeley. "In the majority of the instances," the report states, "the disease has been introduced into new localities within the state by the purchase of infected poultry or partly grown stock from infected areas."

"Concentrating production, sanitary practices and continuous brooding of chicks in a community were found to be important factors influencing the yearly recurrence and spread of laryngotracheitis. Evidence to support the carrier theory was obtained, but controlled experimental data were lacking."

"Prevention in an infected area is a community problem and consists of particular attention to disposal of dead birds, manure, and litter; the control of mechanical carriers; attention to the cleaning and disinfection of secondary feed sacks and poultry crates; and the control of conditions and plant sanitation, as well as individual attention to the health of birds. Prevention in a disease-free area involves prevention in the introduction of stock, in addition to the above recommendations."

"No satisfactory treatment for the disease was found. Careful nursing, attention to the comfort of the birds, avoidance of excessive excitement, and proper feeding were observed to be the best control measures."

### Clever With Needle

Prince Of Wales And Other Men Find Work Restful

Do you know that the Prince of Wales is really clever with a needle? Among the trophies of his skill is a delightful paper-weight worked in petticoat point by His Royal Highness, which he has mounted in silver for presentation to the Queen. The Prince has worked the materials M. R. in yellow, brown, and tan, and has decorated them in red, yellow, blue, and white, all on a black ground. On the back are his own initials, E. P., and the date, 1932. The work is adapted from an Elizabethan design at Windsor Castle.

Many men find needlework a real tonic to the nerves after a hard day's work. Lately the Duke of York has been trying his hand at wool embroidery, and Lord Harewood is helping the Princess Royal to work a set of chair seats.

Men apparently are taking up rug-making in increasing numbers, and this has the great advantage of being a quiet pastime with plenty for accomplishment. The Prince of Wales' paper-weight has been lent by the Queen for exhibition at a London show of English Needlework (Past and Present).

### Royal Harley

Of recent years a number of promising smooth-sawn barleys have been produced by different plant-breeding institutions, including the Dominion experimental farms, but these varieties have not yet been tested for a sufficient length of time to say which is the most desirable. For the present, however, the variety called Royal appears most promising in the west.

### New Metal Alloy

A new beryllium-copper alloy is said to be non-sparking under any conditions and hard enough to cut steel. The new metal will be valuable in mining and other industries where there is often grave danger of explosions caused by sparks from tools.

### Knew His Flowers

Another one for Mr. Ripley. Teddy, nice chaser of a florist shop in Boston, Mass., can identify 1,000 species of the carnations are not up to the standard. Teddy, in his early morning rounds, pulls the withered blossoms out of the vases with his teeth, leaving the fresh ones to bloom.

Oil from giant turtles from 250 to 700 years old is now being refined for use as a cosmetic.

The mighty cuttlefish has arms long enough to encircle a whale's body.

As a result of co-operation between the provinces and the Dominion department of agriculture, new rules and regulations to govern commercial poultry hatcheries throughout Canada

The proposed regulations embody the present hatchery approval rules which have been in operation for the past six years on a voluntary basis. Under the new policy, which will be proclaimed with respect to any of the provinces which desire to adopt it, all commercial hatcheries will operate under the new regulations which provide that such hatcheries shall set only eggs from flocks approved by the provincial authorities; that the hatcheries and their advertising shall be under the supervision of the livestock branch of the Dominion department of agriculture, with particular attention to disposal of dead birds, manure, and litter; the control of mechanical carriers; attention to the cleaning and disinfection of secondary feed sacks and poultry crates; and the control of conditions and plant sanitation, as well as individual attention to the health of birds.

Under the provision in the regulations that all commercial hatchery advertising shall be approved before being issued to the public in those provinces where the regulations are in effect will be assured that any statements made in such advertising are correct.

### Argentine Fights Locusts

#### Galvanized Iron Walls Being Built To Stop Invasion

Argentina has ordered hundreds of miles of very smooth galvanized iron sheeting to be used in building walls across the country to stop invasion by locusts. The sheeting will cost \$2,500,000 and construction expenses will be in the hundreds of thousands of dollars. The government plans to fight the locust when he is a crawler before his wings develop. It is then that he begins his devastating march. A polished wall of iron sheeting will prove too smooth to climb, and if the locusts crawl along the barrier they eventually will land in a trap. Men will be stationed there with rakes to get the unwelcome visitors into large pits, where they will be destroyed.

#### Canadian Oath Of Allegiance

##### Has Been Made Simpler By Measure Put Through House

The House of Commons recently gave third reading to the Oath of Allegiance Act, a measure which greatly simplifies the oath and brings it into conformity with that adopted in the United Kingdom and other dominions of the Empire. The new oath reads as follows: "I, (A.B.) do swear that I will be faithful and bear true allegiance to His Majesty King George the Fifth, his heirs and successors according to law. So help me God." The former oath was ponderous and resonant, one in which the person taking it swore to defend the King "against all traitorous conspiracies" and other treasons. The measure evoked no discussion.

#### Radium Rained Down During Thunderstorms

##### Carried Into Clouds On Same Principle As Moisture

Radium, the most precious of all the elements, is rained down on the earth during thunderstorms. It was reported in Washington before the annual meeting of the American Geophysical Union by G. R. Wait and A. G. McNish of the Department of Terrestrial Magnetism, Carnegie Institution of Washington. The thunderstorm, according to their report, concentrates radium, which is carried up into the clouds by ascending air currents, just as moisture is carried up to form the clouds.

The "Queen Mary" likely will be the name of the much advertised Cunard liner "S.S.34," which is to be christened by the Queen at its launching Sept. 26, in the presence of the King. The choice of a name for the giant vessel has not been announced officially, but it is understood the Queen's assent to the suggestion that it be named after her has already been obtained.

## WORLD HAPPENINGS BRIEFLY TOLD

If you are on relief in Calgary you must keep a cow, unless you take a proportionate reduction in milk allowances. This is the ruling of the civic relief agency.

Nipissing Mining Company had a profit of \$146,826 for the year 1933, compared with a loss of \$161,437 for the previous year. The profit shows includes interest from investments.

Premier R. E. Bennett has accepted the rectorship of Queen's University. He succeeds Dr. G. D. Skelton, under-secretary of state for external affairs, who held the office for six years.

Hon. George H. Sedgewick, chairman of the tariff board, has left for England where he will visit a number of manufacturing plants which are interested in applications pending before the tariff board.

Alan Cuthbert Burns, well-known in the British West Indies, has been appointed governor of British Honduras in succession to Sir Harold Kittermaster, recently appointed governor of Nyasaland.

Pleased with the success of the Mother's Day postage stamp depicting Whistler's Mother, U. S. Postmaster General Farley said he was ready to try a Santa Claus stamp to commemorate Christmas.

Dr Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute. For 40 years Dr. Martin has been associated with the institute.

Creating a legal unit to which Manitoba can turn over the 1,300 acres donated from the Turtle Mountain reserve, the International Peace Gardens incorporated, was granted a license to do business in the province.

Fires in Alberta in 1933 took toll of 30 lives compared with nine in 1932, according to a report of Fire Commissioner Henry Brice. There were 1,832 fires during the year with property loss of \$1,425,612 compared with loss of \$2,406,491 from 1,897 fires in 1932.

### May Ship Via Panama Canal

#### Route Being Investigated By B.C. Livestock Interests

The proposal by British Columbia livestock interests that beef cattle might profitably be shipped to European or British markets is again being investigated. A proposal has been advanced that B.C. cattle could be shipped alive through the Panama Canal from Vancouver and the feasibility of this is under consideration.

Statistics reveal that the move would not be so much a means of finding an outlet for excess production since B.C. already imports more than half as much beef as it produces, but would merely serve as an avenue for bolstering the price, if it were feasible.

Stockmen claim that Alberta beef depresses their prices to such an extent that the industry becomes unprofitable for the B.C. producers. By shipping to the British market, according to the argument advanced, B.C. cattlemen could get a better price for their beef than they can on the home market, even with rates included.

Dr. W. R. Gunn, livestock commissioner, and J. A. Grant, marketing commissioner, have been discussing the matter with livestock men during their recent visit to Williams Lake.

### Rich Radium Find

#### Biggest Pitchblende Strike Yet Uncovered In The North

Radium ore beds at Hottah lake, 100 miles south of Cameron bay, N.W.T., are even richer than first reports of prospecting parties stated. Edward Harries, Toronto mining man and managing-director of Great Bear development, revealed recently.

"It is the biggest pitchblende strike ever to be found in this country or the United States," he continued. He displayed a sack of sample ore. He declared that in his company's field they have a ton of ore sacked and ready for shipment. It was taken out only with sledges and men.

He declared that the ore is worth \$6,000 or \$7,000 a ton, and will be shipped to an eastern refinery. He declared that silver is not showing yet in the new area, as at Great Bear lake.

Children and flowers thrive best with plenty of sun and air.

Canada expends \$135,000,000 annually to keep her schools going.

W. N. U. 2048

## Agricultural Notes

Many Items Of Interest To The Western Farmer

The first asparagus shipments this year from the Niagara district of Canada were made on May 7.

The largest crop of tree fruits in history is expected this year in the Okanagan Valley, B.C.

The first British Columbia strawberries on sale this year at Calgary, Alberta, on May 2 were exactly one month earlier than last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

For the first 19 weeks of this year, up to May 10, 1,224,882 hogs were graded in Canada, as against 1,220,766 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,594 head, as against 13,246 for the same period of last year.

## A NEW MARINE FLAG FOR CANADA IS SPONSORED

Ottawa.—Legislation for a new marine flag for Canada was designed by the banking and commerce committee of the senate. The new flag—if approved by parliament as designed by the committee—will carry a maple leaf on the marine ensign instead of the shield of Canada, as at present carried.

The new measure is the first legislative step taken regarding the coast to coast controversy which has been waged on the floor of the senate. Senator Raoul Dandurand, Montreal, Liberal leader in the senate, sponsored the new marine flag in an amendment to the shipping bill, which passed the committee by a vote of nine to five. The amendment was passed over the objections of Senator W. A. Griesbach, Edmonton, acting chairman, and Senator Arthur Meighen, Toronto, leader of the Conservative forces in the senate. Senators Griesbach and Meighen were of the opinion a new marine flag should await a decision on the national flag.

The amendment to the shipping bill as passed puts the question of a new marine flag up to the senate and the commons. The bill will be reported to the senate at its next sitting, and will go to the commons before the end of this week.

### Edmonton Air Crash

#### Great Fokker Monoplane Burned At City Airport

Edmonton.—Fred Hodgins, aero mechanic, was fatally injured, and Pilot Matt Berry and Airport Manager Capt. James Bell critically hurt when a giant Fokker monoplane crashed and burned at the city airport. Hundreds of holiday seekers saw the crash, which came at the end of the annual Air Club air show.

The machine was taking off from the airport, officials said, and had reached a height of 30 feet when it suddenly "settled down again" struck on the left wing tip and burst into flames immediately, and the three men in the machine were engulfed by the flames.

Hodgins died as he was being taken into hospital. He suffered severe burns and other injuries, as yet not ascertained.

### Memorial Cross

#### Grey Stone Monument For General Sir Arthur Currie Unveiled

Pointe Claire, Que.—On the exact spot in the field of honor where General Sir Arthur Currie stood last year to deliver an address during the 1933 commemoration ceremony, a memorial cross in his honor was unveiled recently.

The grey stone cross was unveiled in memory of the man who was commander-in-chief of the Canadian corps in France and more recently principal of McGill University by Lieut-General Sir Archibald Cameron Macdonald, former commandant of the Royal Military College, Kingston, Ont.

#### Would Be Unworthy Act

Ottawa.—Withdrawal from the League of Nations would be an action unworthy of Canada, Hon. Thomas Chapais told the senate. It might save this country a paltry \$300,000 a year but it would strike a dangerous blow at that international institution whose moral influence was so great.

#### Song and Drama

Lethbridge, Alta.—Lethbridge was a city of song and drama recently. Five halls were required to stage the elocution and vocal classes for 600 boys and girls attending the annual school and dramatic festival of southern Alberta. It is held in conjunction with the 27th annual musical festival of Alberta.

#### Decoration For Sir Geo. Perley

Ottawa.—Sir George H. Perley has received one more decoration to add to the many which now adorn him. The latest is one of a military character—the Canadian efficiency decoration.

#### Medals For Mounted Police

Ottawa.—More than 300 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

### Balanced Railway Budget

President Beatty of The C.P.R. Favours United Railway System Montreal.—A balanced railway budget within a reasonable period of time was promised E. W. Beatty, K.C., president of the Canadian Pacific Railway, if his scheme of a unified and privately administered system were adopted by the railroads of Canada. He made his promise in the course of an address to the Canadian Political Science Association, holding its annual meeting here. He said the unified system would be able to finance justifiable extensions which expanding settlement and development might in future demand.

Mr. Beatty's subject was "The Canadian Transportation Problem," and he dealt with the present situation created by the Canadian National Railways' drift after outlining physical and political events leading up to it. He styled the history of Canadian government railways since 1900 as a "veritable race's progress."

Mr. Beatty announced that placement of labor would be overcome through the normal turnover.

### SWEEPSTAKE BILL IS DEFEATED BY NON-PARTY VOTE

Ottawa.—The Fraser bill to legalize hospital sweepstakes was defeated in the House of Commons 105-57 in a division that cut across party lines. It met the same fate last year.

With the whips off, in an open vote, the three party leaders, Premier R. B. Bennett, Rt. Hon. Mackenzie King and J. S. Woodsworth, united in opposing the bill. Every member of the cabinet, excepting Solicitor-General Maurice Dupre, voted against it.

The bill, which would empower provincial attorneys-general to authorize sweepstakes for the benefit of hospitals and charitable institutions, gained its support mostly from Quebec members, the majority from the Liberal benches. It was sponsored by J. A. Fraser, Conservative member for Cariboo, B.C., after passing the senate 10 days ago by a narrow margin.

Opposing the bill were 67 Conservatives, 27 Liberals, eight Progressives, two Independents and one Laborer. Supporting it were 22 Conservatives, 33 Liberals and two Laborites.

Dupre, for the bill was engineered by M. Carmichael, Progressive member for Kindersley, a retired minister, who moved the six-months' adjournment early in the day. When the house passed the Carmichael motion, it killed the bill.

### Dominion Loan Arranged

#### Three Prairie Provinces Are Assisted By Federal Treasury

Ottawa.—Orders-in-council passed under the Relief Act decisions that a further loan of \$400,000 to assist the treasuries of three of the Prairie provinces, Manitoba, Saskatchewan and Alberta, at five per cent, maturing May 28, 1935, will be made by the federal treasury to enable Manitoba to consolidate two similar loans maturing in May and June of this year. The maturing loans are for \$500,000 expiring May 28, and \$100,000 expiring June 15.

A loan of \$294,000 has also been authorized to assist the Manitoba government in meeting its share of relief costs during May and June of this year.

Saskatchewan and Alberta will be assisted by the federal treasury with loans up to \$750,000 each to enable them to proceed with road building operations this year, according to orders-in-council passed under the Relief Act. The amounts will be advanced as the work proceeds and will be secured by provincial treasury bills at five per cent. interest.

### Lowers Record

#### Miss Joan Batten Establishes New Record For Women In Flight From England To Australia

Darwin, Australia.—Miss Joan Batten, New Zealand aviatrix, set a new women's record for an England-to-Australia flight when she set down her plane here. She lowered her 19-day record, established by Mrs. Amy Mollison in 1930, by 4½ days.

Mrs. Mollison required 19 days to cover the route that since has been flown in seven days by male aviators. Miss Batten kept well ahead of the record all the way from London.

### Would Regulate Trade

#### Proposal Made Before Parliamentary Price Spread Probe

Ottawa.—Wiping out of the Combines Investigation Act to be replaced by legislation giving the Dominion government power to regulate trade and commerce, was proposed before the parliamentary price spread probe. The suggestion was made by C. H. Carlisle, president of the Goodyear Tire and Rubber Company.

The principal object of the Combines Act was to safeguard the public against unwarranted or unfair prices. This safeguard, to which the public was entitled, should be brought about in a more constructive way, the rubber company head stated. Companies should not be prevented from organizing so as to become highly efficient.

Many phases of trade and commerce might be regulated as well as high prices, Mr. Carlisle told the inquiry. Low prices were as destructive as high prices.

Mr. Beatty announced that placement of labor would be overcome through the normal turnover.

Malcolm MacDonald, son of the British Prime Minister, and Under-Secretary for the Dominions, told the House of Commons he would not say the United Kingdom was entirely satisfied with what Canada and Australia had done in the way of implementing their Ottawa Economic agreements.

Referring to a world-wide bi-lateral agreement as the ultimate solution of the silver problem, Mr. Roosevelt revealed to congress he has already begun negotiations with neighboring countries "in regard to the use of both silver and gold, preferably on a co-ordinated basis, as a standard of monetary value."

Payments for present silver holdings in the United States would be limited to 50 cents an ounce, and profits so made would be taxed 50 per cent.

## History Of Seeding Machines

Form Of Seed Drill Seems To Have Been Used In Ancient Times

It is said that the first notice of a machine for drilling grain occurs in Chinese history. Of wheel-barrow form with a hopper for seed, it had three spouts which conducted the grain through three small openers into the ground. An old account in the British Museum of ancient history states that a form of drill has been used in India almost from time immemorial. Through cuneiform writing and illustration, mention is made of a seeding machine of Assyrian origin about 500 B.C. The description leads to the belief that it was very similar to that used in India, being a crudely formed plough of wood with a bowl-shaped seed container. Seed was carried to the furrow through a wooden spout.

Two thousand years elapse before history again mentions seeding equipment. In 1665 A.D., the Romans perfected a machine for sowing grain in drills or rows. Mounted on two wheels, with a rectangular tray containing grain, the rear row of spouts were depressed into a broad, shallow furrow formed by a single broad furrow opener. In 1633 Alexander Hamilton in Britain wrote regarding his sowing machine "for small grain" but gave no explanation of his method. The first real explanation of the invention of a seeding machine was given by an Austrian, Joeph Locatelli, in 1662. This was mounted on wheels, had a rectangular hopper fitted with mechanism for carrying out seed which fell on the ground, and was then covered by a toothed device dragged behind. There is evidence that it was manufactured in Madrid 1664 and sold at a price fixed in the patent.

In 1669 John Evelyn presented one of the e machines with printed instructions and operating directions to the Royal Philosophical Society of London. In 1701 Jethro Tull made some improvements on the machine but was too far ahead of his time. After Tull many improvements were made by Dr. James Cook, an English clergyman. Through the 19th century, advancement in seeding machinery was rapid. Hornsby, an English inventor, brought out the first rubber conductor tubes or spouts, still used to some extent in modern grain drills. Between 1830 and 1860 the hoe furrow opener was perfected; this type is still used in some sections of the United States as well as in other countries. After 1850 agricultural engineers, recognizing that accuracy in placing the proper quantity of seed each meter was vital to producing best results, copied many years developing the seeding mechanism now known as grain feeds or distributors.—W. L. Braley at the World's Grain Conference, Regina.

## Preferred The British

**Army Of The Rhine Won Good Opinion Of Germans**

Why the Germans prefer the British to the allied nations was explained by General Sir Ian Hamilton, who has just returned from Germany.

"It is not in the least because of our officials, representatives, grandees, or millionaires, but because of their memories of the good old rank and file of the army of the Rhine," he told a British legion conference in London.

On the Rhine the Germans had a wonderful chance of comparing the conduct of the various allied troops who were imposed upon them as conquerors during eight years.

"Whether it was to give a penny instead of a kick to a kid, or see an old lady across the road instead of hustling her into the gutter, there is no doubt that our rank and file won tons of golden opinions from all the German women."

## Private Airplane Owners

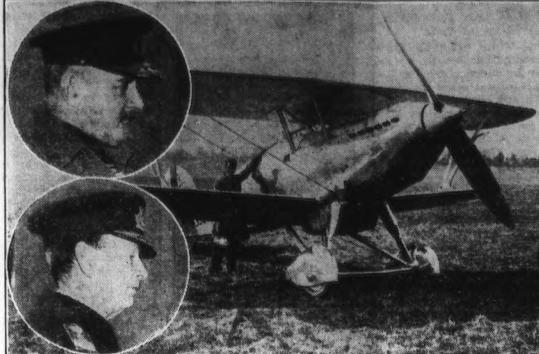

**United States Has Greatest Number Of Any Country**

The United States leads the world in the number of private airplanes. Last year there were more than 1,200 machines in the country. France had 1,387, but this included many used for instruction and owned by clubs. France has the largest number of commercial planes, according to population, one to every 100,000 inhabitants. The United States has one for 560,000. Italy one for every 400,000 and Germany one for every 250,000.

The "butcher bird" is so called because it impales its victims on thorns.

## FAMOUS MILITARY LEADERS AND BRITISH BATTLE PLANES TO ATTEND CELEBRATIONS

Field Marshal Viscount Allenby (top, inset), deliverer of Jerusalem from the Turks during the Great War, and Sir Roger Keyes, Admiral of the Fleet and director of the famous attack on Zeebrugge and Ostend in 1918 (lower, inset), have accepted invitations to attend the Canadian Corps reunion and other events during the final Centennial celebration period in Toronto in August. Five of Britain's famous Hawk Fury battle planes also will participate in the July festivities. Above is a view of this type of plane, claimed to be the fastest combat machine in existence.

## Veteran Develops Hobby

**Crippled During War Toronto Man Raises Tropical Fish**

In the sun-parlor or a house in Toronto's west end a crippled little man sits day after day, watching the behavior of fish. They are tropical fish he has raised himself and he has watched them for eight years.

In his boyhood Bruce Carruthers caught fish, tadpoles and other inhabitants of ponds and lakes. He learned their ways and gained a considerable knowledge of their habits. When the Great War broke out, he was 19 and enthusiastic. He enlisted and went overseas with the first Canadian contingent.

When the Germans advanced on St. Julien in April, 1915, a bullet whistled through Carruthers' spine and lodged under his heart, where it stayed for 16 months. He has never walked since that day, 19 years ago. He lay for months in an English hospital, where he was nursed by a tall, blonde English girl. She is now Mrs. Carruthers.

Time dragged on Carruthers' hands when he came back to Canada, and he turned to the interest of his boyhood—fish. In the sun-parlor of his home now small, brightly colored fish swim in about 40 tanks. On his hands have developed time to become an expert fish-breeder.

"It's a nice hobby for an invalid," he says. "My disability has handicapped me, but it has allowed me to watch my fish more closely than some other fanciers who work are able to do. I have probably seen more about them than lots of other men."

Interest in tropical fish, Carruthers says, is growing as they become more widely known. He has heard of instances in the United States in which people have taken tanks of fish rather than flowers to friends in hospitals, on the ground, the fish provide a lasting interest and do not die as flowers do.

"They have been a fine hobby for me," he says. "They have kept me occupied and preoccupied from thinking too much of my troubles." He is a cheerful little man, but he becomes bitter at the mention of the war.

Carruthers is recognized as one of the leading authorities on fish in Toronto, where, officials of the Toronto Aquarium Society estimate about 1,500 persons raise fish, most of them as a hobby, but a few professionally.—Guy E. Rhoades, Canadian Press Staff Writer.

## Cleaning Took Long Time

First wash in 220 years was recently given to the dome of St. Paul's Cathedral, London, 170 feet above the marble floor in front of the altar. Clinging to narrow scaffolding planks only three or four feet wide, eight men scrubbed the accumulated grime from marble pilasters and gilt capitals. The cleaning took eight men eight months.

## Hairdressers Worried

Hairdressers of Germany are worried over the campaign to induce girls to let their hair grow and plait in order to help the ribbon trade. Nearly 1,000 schools are displaying posters of young Gretchen with long plaits and big bows of ribbon decoratively arranged. If the campaign succeeds it may force many hairdressers out of business.

Approximately one-fourth of the habitable land on earth is under British control.

## An Interesting Business

**Brooklyn Man Gets Good Prices For Imitation Food**

Mr. Henry ter Linden, a small "if" is correct) spends his time making imitation food. "It's a good business. He displays samples of upward of two hundred different items of fake edibles in his shop in Brooklyn. You can get an imitation slice of bread for a quarter, a leg of lamb for four dollars. His products are made of wax and painted. He boasts that you can't tell them from the real thing until you touch them, or try to eat them. He has a staff of three men who mold the wax and a lady artist who does the painting. They work from real models. If they're doing a steak, Mr. ter Linden buys them a swell steak. Afterward they cook it and eat it.

Mr. ter Linden is a serious man. His clients are mainly delicatessen, confectionery, grocery, refrigerator, and ice-and-ton-custard parlor.

They use his food for window and counter displays. You've seen electric refrigerators in store windows filled with his toothsome-looking butter, meats, vegetables, milk, etc. He has, of course, strange orders now and then. He made forty-eight Virginia smoked hams and as many shoulders for the War Department. He doesn't know what the Army did with them; didn't ask, and wishes now he had, for it bothered him. Bellevue hospital bought a big array of his foods. They use it to explain diet to people who can't speak English. The du Pont people brought a great mess of his asparagus for salesmen to take around wrapped in cellulose.

Practical jokers patronize Mr. ter Linden. One day a customer who has no special feelings about him in any way or the other, although if somebody else hit him, he considers it a tribute to his art. Wags buy chiefly chops, ice cream, rolls, and frankfurters. One lady about to become a hostess bought a porterhouse steak, shrieking with laughter as she did so. As Mr. ter Linden points out, she may carry it through a whole dinner.

Many of the lascivious ladies seen in color-plate advertisements were photographed from ter Linden's imitations. They are easier to photograph than real foods, he says. "Take ice cream. You can't photograph real ice cream. Just get some posed right, and it melts." Several months ago, he worked up some numbers for Eskimo Pie. Furniture stores buy whole turkey dinners, strawberry sauce and all at Thanksgiving time and Christmas. He doesn't just sell locally; gets orders from all over.

The American University at Beirut, Syria, ordered a lot of his food. "For educational purposes," he said.

Mr. ter Linden says cheese is the easiest thing to make. If you're interested in phony foods, you can buy a special Get Acquainted Set for \$1.00. It includes a porterhouse steak, a head of cabbage, an apple, a pear, an orange, and a peach.—New Yorker.

## Diversified Occupations

**Last Census Shows Canadian Women In Many Fields**

In Canada there is one male apprentice in the millinery trade. There is one woman, on the other hand, who is manager of a coal mine. We cannot give you the names. The 1931 census of the occupations of gainfully employed persons in Canada.

There are five women who are foremen of mines other than coal mines.

There is one woman who owns a soft drink plant. Two women own or manage tobacco plants.

One woman owns or manages a rubber product plant. There are three women butchers in Canada against 9,500 men in the same occupation.

Mortality rate of the country as a whole, he said, is steadily decreasing.

There is taking place a gradual improvement in the physical condition and health of the people; life is longer and its physical character better.

Mortality from the great constitutional diseases has declined by nearly 25 per cent. in the past ten years.

## Dangers In Kite Flying

**Deaver Electrician Warns Boys Against Metal On Cords**

Boys who fly kites must be sure the string contains no metal. Electrician John Malpiede of Denver, Colorado, warned.

"If a kite cord containing any metal touches a high voltage electric line the boy is likely to be electrocuted," he said. "If such a kite cord should contact both a high and low voltage line fuses in many homes might be blown out."

"Only a short time ago a boy was severely burned when his kite cord struck a high voltage wire. The cord had a fine copper wrapping. It was a wonder the boy wasn't killed."

There is no profession listed in the census in which men are not employed. But on the other hand there are scores of jobs to which women apparently have not aspired.—Financial Post.

## Easy To Believe

**The First Country Fair**

The first agricultural exhibition in North America was held at Windsor, Nova Scotia in 1769, and the 365th anniversary will be celebrated this year at the annual West Hants exhibition. A special program is being arranged and the committee plans to unveil a tablet commemorating the historic event, which led to the country fairs now so important to agricultural districts throughout the country.

The grinding teeth of elephants weigh a total of 20 pounds each.

"Do you know that nice looking boy?"

"Yes, well enough not to speak to."

## Mounties Start Museum

**Hope To Gather Relics And Data Of Early Days**

A museum, which it is hoped, will ultimately give a complete history of the force and be of interest to the entire Dominion, has been started at the Royal Canadian Mounted Police barracks in Regina.

The museum is climbing from a small beginning with photographs of early scenes at present constituting the major attraction.

With many other relics sought, a nine-pound, muzzle-loading gun, of the type dragged by horses, has been secured and will shortly be placed in the museum. The gun is one brought west when the long arm of the law first reached over the plains in 1874.

Among other relics sought are copies of annual reports, arms, old uniforms, hand-written reports and the major cases solved by the R.C.M.P. in the early days.

## A Huge Thermometer

Construction of a colossal thermometer in Paris has been started and shortly its 525 feet of temperatures will be flashing throughout the day. It will be controlled by a small master thermometer, as the huge Eiffel tower is controlled by a diminutive edition of itself. The entire thermometer will be 954 feet high, only a foot lower than the Eiffel Tower.

Since the Washington Monument was illuminated in 1931, an average of ten birds a day have been brainwashing themselves against it.

During the Russian-Japanese war, a railroad was laid across the frozen surface of Lake Balkai, Siberia.

## To Modernize Palestine

**British Government Guarantees Loan Of Two Million Dollars**

The Holy Land is marching with the times.

A resolution authorizing the British government to guarantee a \$10,000,000 loan for Palestine, which is administered by the League of Nations, was introduced in the House of Commons by Leslie Hore-Belisha, financial secretary to the Treasury.

Nearly half of this sum, or \$465,000, will be used for water supply and drainage schemes in Jerusalem, Haifa, Hebron and other places. Another \$2,035,000 goes for public buildings, including a new post office and telephone exchange in ancient Jerusalem.

A sum of \$1,000,000 is earmarked for agricultural credits, to enable the government of Palestine to assist in a long-term credit scheme for Arab and Jewish cultivators alike in the plains and Arab villages in the hill districts.

Another \$1,250,000 will be employed in the re-settlement of Arabs displaced by the increased Jewish settlement—partly caused by the exodus of Jews from Nazi Germany.

For construction of an oil work and reclamation scheme in Haifa, the remaining portion of the loan of \$1,050,000 is set aside.

## Kindness To Animals

**Children Should Be Taught That Cruelty Is Unhuman**

Schools throughout the United States are devoting time during this "Be Kind to Animals Week" to teaching gentle consideration for the rights of those who cannot speak for themselves. There still are innocents who must suffer the knife of the vivisectionists; the sticks, stones, and tins cans of thoughtless children; the hunger and loneliness of abandonment; and the agony of fear-inspired abuse.

If every teacher in every school were to take but fifteen minutes during any week for serious discussion of the problems, the work of humane societies seeking disarmament between men and beasts would be considerably lessened. Abandoned and maltreated pets would gradually cease to be a problem. Neither would wild animals flee at the sight of men if camera hunters became the style instead of gunners and trappers.

Work for the protection and well-being of the "lesser ideas" of God cannot be regarded as a minor activity, but rather, as an endeavor worthy of highest effort. In keeping with our modern conception of a kind and understanding deity, men should be as kind with His earthly dominion so that the full prophecy of the eleventh chapter of Isaiah may come to pass:

They shall not hurt nor destroy in all my holy mountain; for the earth shall be full of the knowledge of the Lord . . .—Christian Science Monitor.

## Going To New Homes

**Saskatchewan Mennonites Trekking To Farms In Northern Area**

About 60 families, mostly Mennonites from the rural municipality of Swift Current, are trekking to north and northwest of North Battleford, where they will settle, under the government land scheme. Mr. Driedger, of the provincial department of natural resources, supervised preparations for the journey of the settlers into the northern section of the province. A number of settlers from the Coulees municipality joined those of Swift Current municipality on the trail to the north.

Some weeks ago a scouting party left the Swift Current district to locate land for settlers who have given up hope of making it go. Since then reported finding many sections of desirable lands where settlers will have an even chance of making their homes and produce at least enough to sustain life without going on charity.

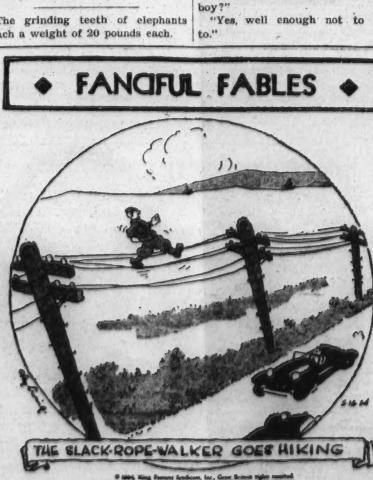

## And That's That

He was awakened in the middle of the night by his nervous wife, who said: "I hear sounds as though someone is coming up the stairs." "What's the time?" he asked sleepily.

"Two o'clock," replied the wife. "All right," he said, turning over; "I'll be home."

She: The directions say to rub the surface down with steel wool. What on earth is steel wool?

He: I'm not sure, but I think it's made from the fleece of hydraulic rams.

**OCCASIONAL WIFE**

By EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

**SYNOPSIS**

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Camilla has a wealthy family and trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy fiancé when she comes to town, and so is studying commercial art in the hope of landing an agency job. Others in the town are Avis Werth, a wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommates, who have quarreled. After a party at which Peter has been invited, when the rest of the members of the party go to a cabaret to continue the fun, Peter and Camilla slip off to the beach. They are interrupted by the noise of ceremonies, name the statue and unveil it! Her manner conveys that she asked no mere humbleness.

"Why not?" Peter inquired. What else could he say? "It's your idea. Go ahead with it."

"Then you will use my title?" hesitantly.

"Sure. It's all right. Any good sculpture is inspiring; and if it's not that good, the name doesn't matter, anyway."

Avis fluttered across the room. "You're a dear to let me do this, Peter. Well, I'll have to run home and get busy. I've several things to do for tonight. You can the name on right away, so everything will be ready. I'll bring the violin over!" Avis did everything energetically by leaps and bounds, and if she were rushed for time, she was accomplishable while she actually accomplished very little except the satisfaction of her own selfish desires.

"She's a pretty good sculptor," Peter observed indulgently, when she had gone. "What do you think, money or name all right?"

"Plenty!" he looked at her in surprise. " Didn't I consult you about name, too?"

Camilla smiled bravely. "But you gave mine no consideration."

"Sure, I did. Fact is, I don't know much about it. I just want to use whatever is best, regardless of whose it is. So you don't like 'Inspiration'?"

"It means nothing. As you just said, it could be applied to any piece of sculpture. I don't say that 'Eager Youth' is the best possibility, but at least it applied to the figure, and pride and ambition of a young girl standing on tip-toe and reaching eagerly from the fountain of life which she holds to her lips in the form of a futed shell. Doesn't that describe it, exactly? There is some imagination in it, anyway. I suppose hundreds of figures and groups have been named 'Inspiration'."

"Yeah, maybe thousands," he conceded coolly. "Well, it done, I can't offend her now. She's been mighty decent to me in a lot of ways."

Camilla held tightly to her words and emotions until she could escape.

"Then, it's all settled," she said lightly, moving toward the door. "I'll have to run home and dress now for the party. See you later, dearest," and kissed him goodbye.

Alone, she thought bitterly, how treacherous love was. It took you to the heights of happiness only to dash you down mercilessly and haphazardly to the bottomless pit of anguish. She just couldn't understand Peter these days.

Was it Avis who had so changed him? True, he had been sweet enough to her whenever she saw him, but his attentions had been more dutiful than spontaneous, his love more perfunctory. She may have imagined that in her resentment toward Avis, however. This matter of naming his statue had hurt her immeasurably. Peter's work was such an intimate part of their love together and their future. It should represent as much as possible their combined interests.

It seemed to her that since Peter had not named his own work, he should have been delighted to give her that privilege and honor. Of course, had Avis' suggestion been

"And she is still a lady without a

name," Peter observed. "The committee will have to decide the title here and now. Any new ideas floating around between you two girls?"

They looked at each other, each reluctant to speak first. Finally, Avis asked sweetly, "What was that suggestion you made the other night, Camilla?" As if it had been of too little consequence to remember.

"I don't think I can offer anything, better than 'Eager Youth'. But Peter must have thought of something better during these weeks while he was having it."

"Peter is. I hadn't thought much about it. Avis brought up the subject several weeks ago. I thought her idea was pretty good, and will do. 'Inspiration,'" repeated thoughtfully. "She does look rather inspiring, at that," he grinned.

"Which of us—the figure or I?"

"Both of you," he bantered.

"Oh, I have a marvelous idea," Avis declared suddenly. She was giving a party for Peter that evening to celebrate the completion of his work. All her plans, so far, had worked as smoothly and satisfactorily as well-oiled machinery, and her confidence was mounting rapidly. She was even venturing a little ahead of her plans, so sure was she of her victory.

"Why not have a christening and unveiling of the statue to begin the party tonight?" Everyone will want to see it, so we'll all come in here for a little refreshment and then adjourn to the cabaret with whoever. I'll treat a thin white cloth to a nappe and it—and, oh, may I, Peter—be the mistress of ceremonies, name the statue and unveil it?" Her manner conveyed that she asked no mere humbleness.

Her mind leaped ahead to plan for the day just before her. If Peter would go away, they would have to crowd all the happiness they could find together into the two intervening weeks. There would be a week of anxiety, suspense and tension, the moment of the prime wait. It would be a difficult time for Peter. She doubted if he could work at all—and he shouldn't. He needed a complete rest after these strenuous weeks of work and anxiety.

For the moment, she regretted her confinement to her own work, but resolved to give Peter every possible moment which she could spare from it. Perhaps she could persuade him to come to the apartment with her for a week, and Ross would generally go back to her mother's for the time.

Her own work was well established now, her copy up-to-date and planned ahead. It promised success, but only time would prove that. Already, her Tiny Tots usually were smiling up at her from the page of "numerous magazines," having glistened at her from signs above the highway, peering down from store shelves where they caressed on the boxes of cereal which they exploited—just as she had dreamed they would be doing when she had created them on that memorable night two months before.

She was proud of her achievement, whatever the outcome might be, but she kept to herself the fact that she was the originator of the Tiny Tots who had recently sprung up everywhere to claim attention. Only Peter shared her secret, and not even Rose knew how important the work was which her sister did for the advertising agency.

**CAN'T SLIP OR SLIDE FALSE TEETH**

Don't use any old kind of remedy to keep your false teeth from slipping or rattling. One where dentists prescribe, such as Dr. Werner's Powder—the largest seller in the world—gives teeth so strong that they last longer. Possibly no slipping or clicking-comfort assured all day long. Form a special comfort cushion to protect your gums. Use a special paste keeps mouth sanitary-breath pleasant. Inexpensive—all drugs.

superior to her own, she would have been glad to favor it. As it was, there was just a heavy weight of sadness in her heart as she prepared for the evening. She recalled with a little wry smile what Peter had said about Avis being mighty decent to him in a lot of ways.

How like a man! to give credit in full measure, pressed down and running over, to some woman whose attentions were an inexcusable intrusion, and to dismiss lightly the sacrifices and generous considerations of the woman who loved him.

The thought suddenly mocked her that if Peter were so susceptible to feminine influences right here in the same city with her, what would happen to him for a whole year in Paris without her? But she dismissed that thought as instantly as it occurred to her. She did not doubt for a moment that Peter was loyal and true. His work abroad, while he had the chance to go, would absorb all his time and thought; and their life together after that would be a joyous existence.

Her mind leaped ahead to plan for the day just before her. If Peter would go away, they would have to crowd all the happiness they could find together into the two intervening weeks. There would be a week of anxiety, suspense and tension, the moment of the prime wait. It would be a difficult time for Peter. She doubted if he could work at all—and he shouldn't. He needed a complete rest after these strenuous weeks of work and anxiety.

**Tribute To King George****Empire Fortune In Having Wise Man For Sovereign**

It is 24 years since King George ascended the throne of his illustrious ancestors, and thus Their Majesties are now upon their silver jubilee year. It is to be marked at its end, by Empire-wide celebrations in keeping with so important an anniversary in our widespread affairs.

For many reasons the people of the Empire will rejoice with their King and Queen in this anniversary year. There is much reason for congratulation in the fact that in the extraordinary events since 1910 the Sovereign was a man so wise, so adaptable, so much opposed to sham and pretence, so thoroughly a man of the people. When we consider for a moment the catastrophes which would have been inevitable, the misery of millions, if the King in these decades had been another sort of King, we realize something of what the Empire has been saved by the shrewd, simple, kindly, dignified King at Buckingham Palace.—*Ontario Journal*.

**Summer Styles For Engines****Canadian National Has Put New Models Into Service**

Some of the latest models in summer styles for locomotives recently steamed out of the motive power shops of the Canadian National Railways. The practice eye will notice a number of mechanical beauty they were the "last word" in up-to-date equipment. Among the latest wrinkles which they carry are feed-water heaters, by which water is pre-heated before being fed into the boilers; track sprinklers to lay the dust ahead of passenger cars; and smoke deflectors to keep smoke from blowing backward into the eyes of the crew and passengers. The work has been underway during the winter months in the various motive power shops of the National system and, in all, more than 200 locomotives have been equipped with these, other modern appliances. All have been put into active service, in readiness for the tourist season to commence.

Her own work was well established now, her copy up-to-date and planned ahead. It promised success, but only time would prove that. Already, her Tiny Tots usually were smiling up at her from the page of "numerous magazines," having glistened at her from signs above the highway, peering down from store shelves where they caressed on the boxes of cereal which they exploited—just as she had dreamed they would be doing when she had created them on that memorable night two months before.

**Almost Instant Relief From Neuralgia****For Quick Relief Say ASPIRIN When You Buy****A Super-Highway****U.S. Government Receives Plans For Coast To Coast Route**

An engineer's idea of the "super-highway" of the future was envisioned by the Pittsburgh chamber of commerce as it submitted plans with the federal public works administration for such a transcontinental route.

Advocates estimate the approximate cost of the 3,000-mile roadway between \$300,000,000 and \$400,000,000, which would be borne by the government. Tolls and other mileage charges would make the project selfliquidating and self-sustaining.

Congested cities in its cross-country stretch would benefit greatly from the proposed high-speed, non-stop thoroughfare would have no intersecting lanes, but ingress and egress by ramps only, and would be 90 feet wide with different lanes for varied speeds.

States traversed under the preliminary plan would be New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Missouri, or Nebraska, Colorado or Wyoming, Utah, Nevada and California.

In their resolution favoring the project, chamber directors stated it would provide a needed main artery for transcontinental traffic and further employment.

Battle With Lion

**French Soldier Is Badly Mauled By Heroism**

A soldier who tried to play Samson with a runaway circus lion was badly scratched and maimed for his heroism. The lion, bored with life in a menagerie, had broken out of its cage and pulled up the planks in the bottom of his cage and headed for the bright lights.

The soldier cornered the lion in an angle in a old fortification. The lion took a swipe at him. He kicked the lion.

Thereupon, the king of beasts bit the soldier in the shoulder and clawed him about the head. Then the lion's trainer arrived and got the fugitive into a portable cage.

Most British City

With 80.1 per cent of the total population of British origin, Moose Jaw has laid claim to the honor of being the most British city in the three prairie provinces. Calgary ranks second with 78.1 per cent, and Brandon, in Manitoba, third, with 73.5 per cent.

Horses Run Quickly

According to statistics, a horse runs three times as fast as a human being; the records show that in running one mile a man requires four minutes and 10 seconds, while a horse does it in only one minute and 30 seconds.

Memorandum—A little note you write on a pad to make yourself wonder next day what you meant by it.

In Pennsylvania, a man has the privilege of marrying his grandmother.

The world's most powerful light-house is located at Cape St. Vincent, Portugal.

**Little Helps For This Week**

"I have finished the work which Thou gavest me to do." John 17:4.

He who God's will has borne and done, And His own restless longings stilled; What else he does or has foregone, His mission he has well fulfilled.

Cheered by the presence of God I will do at each moment without anxiety and according to the strength He has given me, the work that His Providence assigns me. I will leave the rest without concern, it is not my affair. I content to consider the duty to which I am called each day as the work God has given me to do, and to apply myself to it in a manner worthy of His glory, that is to say, with exactness and in peace. I must neglect nothing.—Fenelon.

It is the duty oftentimes to do what thou wouldst not, thy duty too to leave undone what thou wouldst do.—Thomas A. Kempis.

**A Napoleon Museum****French Mission Dedicates House With Relics In Saint Helena**

Longwood, the house in which Napoleon died in 1821, has been inaugurated by a small French mission as a Napoleon museum. Housing the original fittings and many relics of the Emperor, the museum will be kept up by the French government, although few tourists ever reach this island far off the shipping route.

In a simple ceremony the tricolor was raised beside the Union Jack, and in the presence of the British colonial officials, Commandant Marceau, of the French African infantry, formally inaugurated the museum.

Many of the relics which it now contains are the gift of Alfred Day Pardee, of New York, and his wife, who possess the greatest private collection of Napoleon souvenirs in existence.

**An Original Idea****Australian Has Plan To Make "Going Broke" Easier**

Proposing a new plan for making "between-paydays" easier, a man recently placed the following advertisement in a Melbourne, Australia, newspaper: "Gentlemen who gets paid on Thursday and who is usually broke by Saturday will exchange small loans with a person who is paid on Saturday and is not broke until Thursday. References asked for and given."

**YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS****Wake up your Liver Bile**

No Calomel needed

What you feel like, depressed, and on the weak, break your liver bile and pour it daily two pounds of liquid bile into your horse-radish and use it stimulating and cleansing inside.

Many persons have found it useful to take a spoonful of calomel, mineral water, laudanum candy and chewing gum, or rectal enema.

You need a liver stimulant. Carter's Little Liver Pill is a good one. It is a safe, reliable, soluble tablet. Take one for them by mouth. Before bed time.

### Church of the Ascension (Anglican)

Services are held every Sunday evening in this church except on the third Sunday of the month when it is at 11.00 a.m. Next service Sunday, June 3rd at 7.30 p.m.

The congregation are again reminded that the rector has application forms for the summer school held at Banff from July 3rd to 7th. This is the last time of asking.

A numbers from here attended the fight at Olds on Thursday last. It was a good battle with Sailor Goodland getting the decision over some champion from Washington—or was it California. At any rate it was a good card and well worth the price of admission and then some.

O'Neill softballers are still at the top of the heap in the softball league. They chalked up their third win on Sunday morning defeating Crossfield by a score of 9-6. Two many wild pitches by "Kid" Poulin and two costly fumbles by Lavrene Johnson, put the skids under Hugh Ballam's pennant contenders.

**THE LATEST LOCAL DRAMA**  
She: "Oh! Why didn't I look that door?" He: "You're telling me."

Chambermaid: "I beg your pardon Miss I thought you were up."

THURSDAY, May 31, 1934.

#### Locals

It was 86 in the shade on Friday. Mrs. Bert Mabbott of Calgary is visiting Mrs. T. Smeaton.

While the Village Council is improving the streets, why not widen Ross Street just west of the Park.

The post office will be closed on Monday, June 4th (King's birthday) except between 10 and 11 a.m.

Early wheat west of town is a beautiful crop and all grain coming fast.

Ben McLeod and Bill Little left on Monday for the coast via the side-door pullman route.

We are told Bill Blackadder can tell when it is going to rain by looking at the tail of his nanny-goat. Miss Myrtle Metheral left on Monday to spend a three weeks holiday in her old home town—Foremost, Alberta.

May 30th—Mr. Underhill's wheat 14 inches high and in the fourth blade.

Mr. and Mrs. Chas. Fox, Mr. and Mrs. E. Fox and Mrs. Fox, sr. visited friends at Bowden on Sunday.

The first tennis tournament of the season will be played here on June 3, with Carstairs as the opposition.

Remember the dance in East Community Hall on June 1st. Drumheller music.

Madden football team defeated Carstairs by a score 5 goals to 0 at Madden on Sunday.

Norman Dingle will be the speaker at the next monthly Board of Trade meeting on Thursday evening 7th.

The Bridgeland Rovers, one of the outstanding football teams of Calgary will play at Madden on Sunday, June 3rd, at 2 p.m.

The Crossfield high school baseball team dropped a 10 to 9 decision to Irricana at Keoma on Victoria Day.

Dance in Madden Hall Friday, June 1st, sponsored by Madden Baseball Club. Hot dog supper, Brorbridge Orchestra. Admission: Gen's 35c.

F. Eelford and son Wesley, and Rev. and Mrs. W. Little, all of Foremost, were visitors at the home of Mr. and Mrs. F. P. Metheral on Monday and Tuesday.

S. G. Carlyle, Livestock Commissioner, was in town on Wednesday making arrangements for the holding of a Livestock Field Day to be held here on July 6th.

We had a nice shower on Tuesday evening. These showers are very beneficial, and crop conditions are good, although there is very little sub soil moisture.

Mildred Metheral had the misfortune to break the cap off her ankle while playing a game of softball at school on Tuesday.

The Ladies Aid of the United Church will meet at the home of Mrs. Ed. Fox on Wed., June 6 at 3 p.m.

Mrs. R. T. Amery who underwent an operation in a Calgary hospital on Monday of last week returned home today (Thursday.)

The Secretary-Treasurer of M. D. Rosebud No. 280 will be in Carstairs on Fridays during the month of June (except 1st June) for the convenience of ratepayers in that district.

Ramsay Parsons of Dog Pound had the right leg at the ankle on Sunday while playing baseball. He evidently connected up with the plate in sliding home.

Fred Baker has taken upon himself the role of wet nurse. Since poor old Nell (his dog) died Fred is to be seen during the night and early morn clad in pajamas with a bottle of milk in one hand and the twin on his lap doing his best to save Nell's offspring.

Mr. and Mrs. Fred Amery motored up from Walla Walla, Wash. on Sunday and will spend a few days here.

LOST—2 small rugs, blown off line last week. Finder will please return to Mrs. W. H. Miller.

### Grasshoppers Have Arrived In District East of Town

Grasshoppers have arrived in this district and pastures lands east of town are badly infested and some damage to crops is reported. O. E. Jones, F. Laut, Guy Wickerson, Lee Ableman, W. Rogers, and Verne Thompson have secured poison bait from the Government mixing station at Acrene, and in all about a ton has been put out in that neighborhood.

Mr. Jones is of the opinion that the time for action has arrived, and the best time to get the hoppers is in the pastures before they start on the grain.

#### Board of Trade Notes

A meeting of the Board of Trade will be held in the Fire Hall at 8 o'clock on Saturday evening, June 2nd. at 8 o'clock. Committees will be appointed and arrangements made for holding the annual Dominion Day Celebration.

Through the efforts of the Board of Trade the Minister of Agriculture for the Province of Alberta, has granted a field day for Crossfield and district, which should prove of much benefit to the community. The date for this event will be Friday, July 6th.

Preparations are now underway for the annual Board of Trade tour, which will be held around June 20th. More particulars will be announced next week.

#### Drumheller Orchestra at East Community Hall, June 1st.

The next dance in East Community Hall will be held on Friday, June 1st. The Silver Dollar Orchestra of Drumheller will furnish the music. Remember the date.

#### Meeting to Organize Junior U.F.A.

A joint meeting of the Flaval U.

F. W. A. and the Crossfield U. F.

A. will be held in the East Community Hall on Saturday, June 2nd, at 2:30 p.m. for the purpose of organizing a Junior Local. Mrs. Hodgson, and W. Hopkins will address the meeting.

#### The Village Council have been

grading and putting the streets in good shape again by means of tractor and large grader. Jack Lowe and Bob Smart are doing the work, with Mayor Williams and Councillor Asmussen supervising.

Calgary Monarchs defeated the local baseball team on Sunday by a score of 10 to 9. It took twelve innings to decide the issue, and some good, bad and indifferent ball was played. A circus catch by "Punch" Bills was the fielding feature of the game.

R. D. Sutherland is passing around a subscription list for the Carstairs-Crossfield Community Band and is meeting with a ready response, practically enough has been secured to enable the Board of Trade to engage the Band for the Dominion Day Celebration.

The list is still open, and if you have been overlooked, better see Bob before he sees you.

### PATMORE FREED OF BLAME FOR CHILD'S DEATH

Attaching no blame to the driver of the truck, a coroner's jury inquiring into death of Margaret Jakob, brought in a verdict of accidental death Wednesday evening at the inquest.

#### Objects to Sunday Games

Editor Crossfield Chronicle

Dear Sir:

Will you kindly publish the following letter in your paper re Sunday games. I am not posing as an authority on this subject, am merely stating my humble opinion and perhaps an older pen than mine may throw more light on this subject. We are told plainly to "Remember the sabbath day, to keep it holy." In the dictionary a definition of this last word is given as meaning "sacred." I think we all know what this word implies, at any rate I for one was taught to observe anything that is sacred with the utmost reverence. It may be said there is no compulsion in connection with these games, in other words those who don't like to watch the games played can keep away. While this may be true so far as it goes, the fact remains that no one lives to themselves and I think if Sunday games are allowed to continue indefinitely no one knows how far its influence will be carried. It may be only a matter of time when the majority of our boys and girls will be enrolled to this idea and practice. Why can't these good games be played on Saturday afternoon? It would seem only a matter of making a start in this direction to get accustomed to it as time goes on, and let Sunday be observed as it is meant to be.

Yours truly  
H. M. Seville,

A Denech truck burned up near Didebush Tuesday night.
